$$\begin{array}{c} -exec(Gioss \\ a) \sum_{n=1}^{n} b) \sum_{n=1}^{3} a = \sum_{n=1}^{4} (3-2i) d) \sum_{n=1}^{3} (2i+x) e) \sum_{n=1}^{5} (ij-1)(5-i) (5) \sum_{n=1}^{5} (2i+x) e) \sum_{n=1}^{5} (ij-1)(5-i) (5) \sum_{n=1}^{5} (3-2i) d) \sum_{n=1}^{5} (3-2i) e) \sum_{n=1}^{5} (3-2i) e)$$

```
podenos aprinar que \int_{0}^{\infty} i(i-1)(5-i) = \sum_{i} (i-1)(5-i) ? fundipique.

1 \Rightarrow 0, \Rightarrow 2, \Rightarrow 4, \Rightarrow \Rightarrow 0, \Rightarrow 2, \Rightarrow 4, \Rightarrow 1 \Rightarrow 0, \Rightarrow 1 \Rightarrow
```
